### The Intelligencer.

The Present Status of the Wheeling and Lake Eric Railroad Project.

From the Pittaburga Commercial.

While crossing the Mouongahela suppension bridge about four o'clock last evening our reporter discovered a building in flames on the south bank of the river near the Silgo mills. He repaired at once to the scene of the conflagration and arrived there just in time to witness CONTRACT TO BE MADE IN TENDAYS. From Yesterday's Register. Since the vote of the 3d inst., author zing a subscription of \$225,000 to the "up river" road, thus giving us another Eastern outlet, I desire to again direct ata trial of the new Babcock Self-acting Epgine, purchased by Park Bros. & Co., for the Black Djamond steel works. The building in which the fire was kindled, was constructed of dry pine boards, about fourteen feet in length, saturated with oil; it was about twelve feet square, inside of the structure were placed a number of old oil barrels and over two wagon loads of pine shavings well saturated with crude oil, over half a barrel of that 'material having been used for this purpose, fir addition to about ten galloms of kerosine. a trial of the new Babcock Self-acting astern office, dvanced state of the pro-mation to the advanced state of the pro-osed road to the northwest, known as one "Wheeling and Lake Eric Railroad." his road was incorporated April 6, 1871, y Joel Wood, L. Spence and James Kerr, Martin's Ferry, Ohio, Hon, Chester D. of Martin's Ferry, Ohio, Hon. Chester D.
Hubbard and Hon. Joseph Bell, of Wheeling, and John Baster, Jacob Copeland,
John D. West and A. B. Paul, of Harrison county, Ohio. These gentlemen made
due publication for more than thirty days
due publication for more than thirty days dition to about ten gallons of kerosine. A match was applied to the shavings, and, as there was a high wind blowing, in an ording to the laws of Ohio, of the time opening the books of sub-when more than ten per instant the entire structure was a sheet of fire, the flames bursting through the crevices between the boards on all sides and on top of the building. The fire was permitted to burn until it could burn no ey gave due notice of an election for rectors at Bowerstown, Harrison coun-Ohio, for September 20, 1871. At that ection, the above named Wood, Bell and flercer, and the building was in danger of dropping to pieces, when a stream from the self-acting Bacock was turned upon it together with Nathan Hussey, of son, Jacob Justis, of Carroll county, and in less than a minute the fire was unand Hon. Thos. W. Chapman, of Starke county, Ohlo, were elected Directors, der complete control, and in just fou every spark of fire was extin-The trial was witnessed by a and they organized by electing a President, Treasurer and Secretary. Since that time the company has been vigorous-ly working and its success is now almost large number of business men, manufa turers, firemen and city officials, all of whom expressed themselves as fully satis-fied with the test and many of them were y working and its success is now almost laced beyond a doubt, if our people take he same interest in "it as is taken along he line in the East, and as its importance our citizens demands. The country surprised at the wonderful effectiveness of the machine. th which the road passes is as rich ultural and mineral wealth, and he people as wealthy and enterprising as my other in the State of Ohio. The stock

the machine.

As the principle of the engine has been fully explained through these columns, it is unnecessary to repeat it, but a few words in regard to its simplicity in construction and action may be of interest. The Babcock self-acting engine consists of two air-tight copper cylinders having a capacity of about forty gallons, which are filled with water and soda in solution. Inside is a cup for holding the acid, which is steadily and rapidly increasing, and with the aid of Wheeling and Sandusky there is scarcely a doubt but that a local subscription of \$10,000 per mile may be filled with water and soda in solution.

Inside is a cup for holding the acid, which turning a hand screw. Attached to each cylender is a gauge to indicate the pressure, and on the opposite are the attachment for hose, which are so arranged that either or both cylinders can be used through either attachment, or if required, two lines of hose may be attached and of the Directors was held in Navarre hark county, on last Thursday, at which ll were present except Mr. Bell, who is n New York looking after the interests of the company there. Besides the meeting two lines of hose may be attached and two streams thrown at one time. These cylinders are placed on a light one horse carriage, upon which is also a hose reel, esentatives from Huron, Medina, Ash-nd, Wayne, Stark, Tuscarawas, Carroll, Harrison, Jefferson and Belmont counties, Ohio. The most flattering and substantal reports come in from nearly all points on the line from Martin's Ferry to Sandusky, and the project can no longer be regarded as a mere experiment. For many weeks President. Wood and most of his associates have been giving their time almost exclusively to the work, and their efforts have been noldy seconded by hosts of influential and worthy men at many points on the line. carrying about two hundred feet of hose thy men at many points on the line. rangement that a boy can operate it as effectually as the most experienced fire ple of Wheeling did but half kingdom of wealth and popuman. To put it in action it is only neces lation and the magnificent country waitsary to let in the acid and in a few seconds mg for railroad development along the you have a pressure of one hundred or two hundred pounds if necessary, and as the hose are already attached you have and if they could know what an miversal desire there is among the people open up direct trading communication a machine ready for service that will be with this manufacturing and commercial far more effective than the best steam fire engine ever invented. Another commend-able feature of the Babcock self acting ity, they would not hesitate one moment o stretch out their hands and invite the ow of trade and travel to their gates. I engine is that it is always ready for use; it never freezes, and having no complicated machinery about it, it never gets out of order. It is just the thing for country ave found the desire almost universal along the Short Creek, Connoton and Tus-carawas valleys, and beyond Zoar and Na-varre on the plains, to Sandusky. If this bad should perchance fail or be diverted towns where water is scarce, as it will render as much service with forty gallons of water as a steamer would with forty barrels; and in addition to this, it can be rom Wheeling for want of a proper effort in her part, it will be the saddest mistake of her history. If Wheeling promptoperated by two men and one horse, and its first cost is but from \$1,500 to \$5,000, while an ordinary steamer costs over six thousand, and requires at least three gives to this road her dship and aid she will sustain toward such a friendly and influential relation s will make it largely tributary to her horses and eight men to operate it. Again realth, her manufactures, her merchandisthe Babcock self-acting engine can be used any place without the destruction of ingher business and population for all time to come. No existing or proposed road traverses a superior section of country, property by water, as is always the case where a fire is extinguished by one of the ordinary steam engines, as it does not de-pend upon the amount of water thrown for its effectiveness, the water being used nor one that opens up such a desirable ection for our trade. In connection with only as an auxiliary for the purpose of conducting gas to the flames. For extinguishing oil fires there is certainly nothing yet discovered equal to the Babcock self-acting engine, and as a large proportion of the fires in this city originate at oil works and refineries, our city fathers would display their wisdom by nurchasing stown, is a matter of great importance Wheeling. From either of the last named points to Wheeling the two roads rould be operated as one, and without the former road the latter may be drawn from Wheeling east or west. With these roads works and refineries, our city fathers would display their wisdom by purchasing a few of these machines for use in the Fire whereing east or west. With these roads we will have opened to us the city of Canton, with her 9,000 population, and the city of Akron, with her 11,000, and the rich Valley of the Cuyahoga besides. We will be some twenty miles nearer Cleveland than by the Cleveland & Pitts-burgh good and some first party for the control of the control Department.

The Iron Deposits of Tuscarawas

rgh road, and some fifty miles nearer an by the proposed Wheeling Creek The following is an extract from the and Athens road. We will be sixty miles nearer Sandusky and fifty-five miles near-er Toledo than by any other existing or proposed road. It is susceptible of first report of the President and directors of the Lake Shore & Tuscarawas Valley Railroad to the stockholders: "The very large deposits of black band

nathematical ; demonstration that this road can hardly fail to be a very profitable investment. In direction and an hardly fail to be a very le investment. In direction and to the source of great wealth; if we may it presents advantages superior contrast the extent of the deposits of this prontable investment. In direction and territory it presents advantages superior to the Cleveland and Pittsburgh railroad, whose stock watered up to \$142 85, 18 now yielding 7 per cent per annum, payable quarterly, free of taxation, and leasted at that rate for 999 years, which is equivalent to 12 or 14 per cent on the original stock.

Within the next ten days, I have no doubt, the road will be under contract from there is Toledo, on a surer stock basis, and on more favorable terms in other respects than any other road, through similar territory, ever knew. With such a stock rilory, ever knew. With such a stock basis its bonds and credits will be good anywhere, and the investment safe and profitable.

I carnestly commend this enterprise to good any capitality. I carnestly commend this enterprise to our capitalists, business men and citizens generally; and urge upon them to give to the subject an early and hearty attention our capitalists, business men and cliizens generally; and urge upon them to give to the subject an early and hearty attention the business and hearty attention to the business and hearty attention to the subject and anyport. As soon as the contract is closed, its terms will be made known to our people, and they will be invited to give their money and co-operation in a more earnest and tangible form than they have the subject of the production and the production of the production in Scotland, in 1870, of 1,160,000 tons. Of 7,100,000 tons of iron imported from Great Britain into the United States, in twenty years, from magnificent country awaits an opening to 1850, more than three-fourths was black our industries and business; and let them band iron from Scotland. Estimating the 1870, was 655,000 tons-an amount three magnificent country awaits an opening to our industries and business; and let them reflect that, if this opportunity should be lost, it can never be regained, and that band iron from Scotland. Estimating the front that, if this opportunity should be st. it can never be regained, and that cre is a "tide in the affairs" of cities, thick, taken at the flood, leads on to forme. "With this road and a bridge, our elities and accessibilities as a railroad y will be established, and other enterses will graviate towards us, and our osperity will be assured. XX. band iron from Scotland. Estimating the lost, it can never be regained, and that there is a "tide in the affairs" of cities, which, taken at the flood, leads on to for-lune." With this road and a bridge, our salities and accessibilities as a railroad of the will be established, and other enterdustry, progress, and enlightment. It has raised up from bleak and barren moors

but that Hymen is an eye-opener

prosperity will be assured.

Death of a Hermit in Taylor Co.

From the Granon Sentinel.

On last Monday morning an old man by the name of Wm. McDanniels, living about seven miles from this place up Tygart Valley river, this county, was found deal in his own house. An inquest was held and the jury rendered a verdict of death from natural causes.

The McDanniels of Manager and roll of machinery, teening with restless industry. We have quoted these remarks in order to show what inexhaustible wealth we have in the large deposits of the black band ore in the Tuscarawas Valley, on the line of this Road, and how productive the capital invested in its development, by the crection

death from natural causes.

Mr. McDanniels was a man of about 65 years of age, and had for years lived alone—never having been married. The old man seems to have been a great miser, and lived a very secluded life. When lound it was apparent that he had been which the black band ore is obtained in found it was apparent that he had been dead about a week. He was of such a peculiar character that his nearest neighbors scarcely ever visited his home. He owned about six hundred acres of land, and was supposed to possess a large amount of money, but upon a search being made, only about \$200 could be found about his premises.

A veny intelligent bear went to the sheep-pen in Sherman, Vt., untied the door string, selected a sheep, tied up the door again, and made off.

Gov. Brown, of Tennessee, intends to call a special session of the legislature of bis state, to redistrict the state and to remedy some defects in the legislation of the recent session.

BEN WADE gets \$10,000 a year for muddling the Northern Pacific Railway Company on points of law.

The Bubcock Fire Extinguisher. Its Simplicity and Effectiveness.

A Washington (Pa.) Lawyer Arrested for Ferging a Pension Paper. From the Pittsburgh Commercial. A day or two ago information was made before Commissioner Gamble, charging A. Wylie Wilson, Esq., a lawyer and claim agent, residing in Washington Pa., with forging a voucher for back pay and bounty, and receiving and withholding the money obtained on the voucher I is alleged that Mr. John Lennox, father of John E. Lennox, who was a soldier in Company I, Second U. S. Cavalry, placed his claim for his son's back pay and bounty in the hands of Wilson for collec-tion. The claim was duly allowed by the proper authorities in Washington City proper authorities in Washington City, and a certificate was issued for \$678.34, and forwarded to Wilson as agent for the claimant. Instead of handing the papers over to Mr. Lennox, it is alleged that Wilson forged the paper of over to air. Lennox, it is alleged that Wilson forged the name of Lennox to the receipt and paymaster's check, and then litted the money and still retains it in his possession. The information was made by Mr. Lennox on Friday, and a warrant for the arrest of the accused was issued. Saturday morning United States District Attorney Swoone in whose heads the

Saturday morning United States District Attorney Swoope, in whose hands the case is, received a telegram from Washington announcing that Wilson had been arrested, and that he is now in jail at that place. He will be brought to this city today, when he will be held to ball for trial at the February term of the United States Court, which will commence on Monday, February 2d February 2d. February 2d.

It is stated that a large amount of the pensions now being paid by the government are paid, upon fraudulent papers, and the duty is imposed upon United States Attorneys to see that all parties guilty are convicted and punished. Mr. Swoone has already presented some half.

Swoope has already prosecuted some half a dozen to conviction, and will do what

he can to protect the government from being robbed in this way. The Sandusky Register reports that President Wood, of the Wheeling & Lake Eric Railroad, considers the prospects of his road very encouraging, and that the road will be put under contract as soon as the local subscriptions are raised. The Register also states that Judge A. W. Handry of that they is on his way to Col. Hendry, of that city, is on his way to Col-umbus to ask the passage of a bill allow-ing Sandusky to tax itself in order to aid in the construction of that line of road. Two thirds of the heavy tax-payers of that city have signed a petition for the passage of such a measure.—Toledo Blade.

AT a school where words were "giver out" for subjects in composition a "mute inglorious Milton" produced at sight, this sentence on the word "panegyric:" "A few drops of panegyric, given on a large lump of sugar, is often best with an infant with the stomach-ache."

#### COMMERCIAL AND FINANCIAL MARKETS BY TELEGRAPH

New York Money and Stock Market. NEW YORK, January 29. - GOLD-Sold up to 110 this morning, on all kinds, of sensational rumors but closed heavy at 109 a109 c. Loans were from 4 to 7 per cent. for carrying. Clearings \$54, 750,000. GOVERNMENTS-Strong and ligher.

STEHLING EXCHANGE-109.

6's of 1881, coupons.

STOCKS-Heavy during the greater part of the day, and prices declined 100 1 per cent. The decline was most market in Michigan, L'acific, Ohio's, Lake Shore and Hannibal and St. Joseph. At a firmer tone, and there was a recovery from 1 to 1 per cent. in the govern ment list.

Money - Active for stock brokers to-day at 7 per cent, currency to ' percent gold, but at the close the supply at 7 per cent currency was in excess of the demand.

STATE BONDS - Southern State

curities on last call generally steady. Missouri exceptionally weak and declined nearly 2 per cent.

Chicago Market.

A large stock of VESTINGS of every descrip

produced.

Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous and emaclated, having a singular appearance about the eyes, Cough, and Symptoms of Consumption.

YOUNG MEN Who have injured themselves by a certain practice, induged in when alone, a habit frequently learned from evel companions, or at school, the effects of which are nightly felt, even when saleep, and, if not cured, renders marriage impossible, and destroys both mind and body, should apply immediately.

What a pity that a young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyments of life by the consequences of deviating from the path of nature, and indulging in a certain secret habit. Such persons must, before contemplating

MARRIAGE
reflect that a sound mind and body are the most necessary requisites to promote connublat happiness. Indeed, without these the journey through life becomes a weary pligrimage; the prespect hourly darkens to the view, the mind becomes shadowed with despair and filled with the melancholy reflection that the happiness of another becomes blighted with our own. MARIKIAGE.

Married Persons, or Young Men contemplati
marriage, being aware of Physical Weakne
Organic Beblitty, Deformities, speedily cured.
Lie who places himself under the camerof Dr.
married President of the Contemplation of the Contemp

miscrable and marriage impossible, is the penalty paid by the victims of improper tadulgences. It ours persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that understands the subject will pretend to deny that the power of procreation is lost scoure by those falling into improper habits than by the prudent! Besides being deprived of the pleasure of healthy offspring, the most serious and destructive symptoms of both body and mind size. The system becomes deranged, the Physical and Mentale Punctions Weakened, Loss of Progreative Power, Nervous Irritability, Dyspepsia, Papitiation of the Heart, Indigestion, Constitutional Debility, and Wasting of the France, Cough, Consumption Decay and Death.

DR. JOHNSON,
Member of the Royal College of Surgeons, London, Gradaate of one of the most eminent Colleges in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philadelphia, and elsewhere, has effected some of the most astonishing cures that were ever known. Many troubled with ringing in the head and ears when aeleep, great nervounces, being alarmed at sudden sounds, bashfulness, with frequent blushing, attended sometimes with derangements mind, were cured immediately.

Dr. J. addresses all those who have injured nemselves by improper indulgence and solitary abits, which rain both body and mind, unfitting hem for either business, study, society or mar-

ons, general Desired effects on the mind much to be dreaded. Lose of Munry, Con much to be dreaded. Lose of Munry, Evil Forr are much to be dreaded. Loss of Memory, Con fusion of Ideas, Depression of Spirits, Evil Fore bodings, Aversion to Society, Soli-Distrust, Love of Spilinds, Timidity, Ag. are some of the avil Gentlemen's Furnishing Goods, Having lately employed one of the most expe-lenced and reliable Rastern Cutters, we are pre-ared to turn out these Goods in a style never

FALL AND WINTER.

Is just receiving his large and extremely stylisl stock of DISEASES OF IMPRUDENCE.

When the misguided and impradent votary of pleasure finds that he has imbited the seeds of this painful disease it too often happens that au lil-timed sense of shame or dread of discovery deters him from applying to those, who from education and respectability, can alone befriend him, delaying till the constitutional symptoms of this horrid disease make their appearance, such this horrid disease make their appearance, such as ulcerated sore throat, diseased nose, nocturna pains in the head and limbs, dimoses of sight deathess, nodes on the shin-bones and arms, progressing with frightful rapidity, till at last the palate of the mouth or the bones of the nose fall in, and the victim of this swful disease becomes a horrid object of commisseration, till death puts a puriod to the dreadful sufferings, by senting

makilifulness of ignorant pretenders, who, be the use of that DEADLY POISON, MERCURY uin the constitution and make the residue of the plasmable. 1871. Fall and Winter. 1871.
